After thinking about this more, what would you recommend? Sarah has greatly assisted on current source/use by reviewing your CZA, etc. In conforming the ROD to the template Wendy created via the Linc AE approval process, has Wendy reviewed the ROD? If so, is there a need for Sarah to review it as well for a hydro-geo perspective?

Hi Douglas,

I just wanted to check in with you to see what kind of review we would like from Sarah on the ROD.

Thanks!

Valois

Hey Valois – I recall receiving this and reading through it before one of the meetings. However, I was not under the impression your team was requesting comments on it so I think I may have misunderstood that.

Are you looking for a hydrogeologic review + comment of this? If so, what are the technical questions you are looking to inform?

Sarah

Hi Sarah,

In all the demands we are making on you, this document may have fallen off the shelf. The good news is that it is the easiest and shortest one to review.

Hi Lucita & Sarah,

Attached are the Dewey Burdock aquifer exemption document in the format similar to the Linc AE. I have also included the new guidance document so Sarah can see the items that need to be addressed in the AE document. There is an aquifer exemption checklist starting on page 6 of the guidance memo. I will fill that out and have it available as part of the administrative record. Or I could include it as an appendix to the AE document. Whatever you think makes sense.

Sarah,

Douglas asked me to get this info to you ahead of our meeting next Thursday, so that is why I am sending it to you now.
